

JB Management Selects Boldon James to Provide Enhanced Policy Based Messaging Capability to US Navy

JB Management's Formatted Messaging application extended to incorporate message labelling for use by up to 30,000 users across 300 US naval vessels

Maidenhead, Berkshire, U.K. – 30th July 2008

Boldon James, a leading provider of secure information exchange solutions and a wholly owned QinetiQ subsidiary, today announces a contract to develop Microsoft based message labelling functionality for integration with JB Management's (JBM) Common Message Processor© (CMP) application suite.

JBM, the recognised provider of formatted message (MTF) editor processing for the United States Department of Defense community, is partnering with Boldon James to provide the US Navy with enhanced military messaging capabilities by providing messages in a 'Defense Message Dissemination System (DMDS) Interchange Format'. Based on ACP126 (modified) this enhanced format will include additional elements of service, X.500 DN recipient syntax, and a raft of DMDS-unique attributes. Message drafters will thereafter be able to select security labels from approved Security Policy Information Files (SPIF).

"This contract recognises the formidable strength of Boldon James' message labelling and access management expertise for complex organisational messaging requirements. It also extends our widely accepted protective marking mechanism to new platforms and demonstrates the robust nature of our policy based labelling strategy," commented Kieron Sambrook-Smith, Sales and Marketing Director.

About Boldon James

Boldon James, a wholly-owned QinetiQ subsidiary since October 2007, has over 20 years' experience specialising in secure messaging solutions tailored to meet the formal information exchange requirements of the worldwide defence and secure government sectors. Its Version 3 Secure Information Exchange (SIE) architecture now provides a suite of Microsoft commercial off-the-shelf (COTS) functional extensions across the Unified Communications collaboration and conferencing suites, resulting in solutions with a low total cost of ownership (TCO) and significantly

reduced deployment risk. Boldon James is a Microsoft Gold Certified Partner and exclusive 'Global Go-To-Market Partner for Secure Messaging'.
